WORK EXPERIENCE

Intern, Engineering

Stryker

- testing, optimizing and implementing processes for serial production
- building prototypes

03/2024 – 09/2024
Freiburg, Germany

Bachelorarbeit

Paul Scherer Institut 

- 3D Printing Research with abrasive materials in the field of neutron research
- Optimizing the quality of products through testing and evaluating new manufacturing processes
- post-processing of gcode through own program to expand the capabilities of a Raise3D Printer

10/2023 – 02/2024
Villigen, Switzerland

Working student

EnBW - Energie Baden-Württemberg 

- Designed and deployed serverless Azure Functions to serve as a API for energy market data access.
- data processing and analytics, including the extraction, transformation, and provisioning of energy market data.

10/2022 – 09/2023
Karlsruhe, Germany

VLYBY DIGITAL

- Worked on internal tools, encrypting and decrypting information for links
- Optimization of Ad-Players

07/2020 – 09/2020
Munich, Germany

EDUCATION

Computer Science, Master

University of Zurich 

Major: Artificial Intelligence || Minor: Data Science

02/2025 – present
Zurich, Switzerland

Computer Science, Bachelor

Karlsruher Institut für Technologie

10/2020 – 01/2025
Karlsruhe, Germany

Software Engineering Immersive

Codeworks 

- Graduated May 2020
- Curriculum: Full Stack Javascript and Computer Science

02/2020 – 05/2020
London, UK

Exchange Semester, Computer Science

University of Wisconsin-Madison 

08/2019 – 12/2019
Madison, WI, USA

General University Entrance Qualification

Justus-von-Liebig-Schule Waldshut 

- Final Grade: 1.4

09/2016 – 07/2019
Waldshut, Germany

Exchange school term

Centre For Learning 

06/2014 – 08/2014
Bangalore, India

LANGUAGES

English

C1 / TOEFL 107

German

native language

TECHNICAL PROJECTS

Glycoplan

- An interactive nutrition plan created based on Dr. med. Kurt Mosetter philosophy, with nutrition details and energy distribution.
- Technology Stack: React-native, Redux, React-native-Paper

Fitvid-Tracker

- A web application that allows the users to organize and schedule their workouts with YouTube Videos.
- Implemented frontend logic with React and Redux, fetched Data from the server, and used Material UI for styling
